SUMMARY

Full Stack Developer (MERN) skilled in building scalable, high-performance web applications. Proficient in designing **RESTful APIs**, implementing **JWT authentication** with **RBAC**, and crafting responsive **React.js** interfaces with **Tailwind CSS**. Delivered production-ready features supporting **100+ active users** with a focus on clean code, **MVC architecture**, and real-world client requirements.

TECHNICAL SKILLS

- **Frontend:** React.js, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, Responsive Design
- **Backend & APIs:** Node.js, Express.js, MongoDB, RESTful APIs, MVC Architecture
- **Authentication:** JWT, Role-Based Access Control (RBAC)
- **Tools & Deployment:** Git, GitHub, Postman, Vercel
- **Familiar With:** Flutter, Dart, Python, PostgreSQL

PROFESSIONAL EXPERIENCE

MERN Stack Developer | **DRUV 360** 2025 – Present

- Built and maintained **Service Connect**, a full-stack service marketplace platform supporting **100+ active users** using MongoDB, Express.js, React.js, and Node.js.
- Designed and implemented **15+ RESTful API endpoints** following MVC architecture, with **JWT-based authentication** and role-based access control (**RBAC**) for secure multi-role access.
- Developed responsive, accessible UI components using **React.js** and **Tailwind CSS**, improving cross-device compatibility and user experience across mobile and desktop.
- Optimized API response reliability by implementing structured error handling and efficient state management with **React Hooks**, reducing runtime errors by **~30%**.
- Collaborated with clients to translate real-world requirements into production-ready features, consistently delivering within project timelines.

- **Completed an industry-focused MERN stack internship**, gaining hands-on experience in full-stack development and real-world project workflows
- **Built dynamic and responsive frontend applications** using **React.js** and modern **JavaScript (ES6+)**, focusing on clean UI and efficient component design
- **Developed reusable components and managed application state using React Hooks**, improving code maintainability and overall application performance

PROJECTS

Service Connect - Service Marketplace Platform

github.com/service-connect

MERN Stack Developer | Druv 360

- Architected **Service Connect**, a full-stack service marketplace with secure booking workflows, user authentication, and admin dashboard using the **MERN stack** and **RBAC**.
- Implemented **JWT-based authentication** with role-based access control supporting 3 user roles (Admin, Provider, Customer), securing all protected API routes..
- Built responsive UI using **React.js** and **Tailwind CSS**, improving cross-device compatibility and enhancing user experience across mobile and desktop.
- Enhanced application performance and reliability by optimizing API communication and managing state with **React Hooks**, reducing runtime issues and improving stability

AuraWear - E-commerce Application

Live: AuraWear.vercel.app

- Developed a full-stack e-commerce platform using the **MERN stack (MongoDB, Express.js, React.js, Node.js)** with product catalogue, cart management, order processing, and **Stripe payment integration**.
- Implemented **JWT authentication**, protected routes, and an order management system handling end-to-end purchase flow.
- Deployed to **Vercel** with optimized build configuration; achieved consistent load times under **2 seconds** on desktop and mobile.

EDUCATION

- **Bachelor of Computer Application (BCA)**
Kerala University | 2020 - 2023
